SUMMARY

An accomplished and highly motivated Frontend Developer with over 9 years of experience in various web, mobile, SaaS, and multimedia projects. Passionate and driven to learn new technologies, and skilled in utilizing strong coding habits to create concise, sustainable, and reusable solutions. Adept at collaborating within a team or working as an individual, and is equipped with a diverse skill set spanning multiple coding languages/libraries, computer software, and hardware knowledge.

SKILLS

- HTML5, CSS3, JavaScript
- jQuery, jQuery UI, jQuery Mobile, jQuery DataTables, Highcharts/Highstock, Google Maps API
- XSLT, XML
- Modular development, CMS
- Expert understanding of UX/UI
- Mobile development, cross browser compatibility, and DOM manipulation
- Responsive design, media queries
- Excellent debugging and testing knowledge

EXPERIENCE

Lead Frontend Developer, The Yacobian Group

2014 - 2017

- Worked with talented engineering team to build proprietary SaaS platform called Blueday in an agile setting
- Utilized modern HTML/CSS/JavaScript methods and libraries to build flexible, modular solutions
- Worked with large-scale datasets to load and display tabular, modular, and visual tools and layouts
- Responsible for maintenance and development of UX across large scale SaaS environments, including client specific branding, mobile integration and support, and screen-to-print layouts
- Collaborated closely with design teams, business analysts, QA, and development team members
- Produced functional and technical documentation for new and existing product features
- Performed R&D and lead implementation of new features such as Highcharts interaction and advanced DataTables
- Clients included: L Brands, Victoria's Secret, Staples, and Advanced Auto Parts

Frontend Developer Contractor, NANAND78.COM

2009 - 2014

- Performed front end development using modern HTML, CSS, and JavaScript for web and mobile projects
- Worked with professional designer to produce usable code projects for a diverse client set
- Developed responsive, modern layouts with pixel perfect representation of client needs
- Created custom JavaScript solutions/modules for static and dynamic interfaces, data representation, and mobile display, as well as kiosk usage
- Utilized cross-browser compatibility and supported change requests for existing or past projects
- Clients included: Southern Wine & Spirits, Enerplus, Train Enquiry, State Farm, ZScaler, and Cisco

Frontend Developer & Video Editor Contractor, Media Elements / Dark Hour Studios

2009 - 2014

- Utilized modern HTML/CSS/JavaScript for web facing projects
 - Converted contents from professional designers into functional modules and implementation pieces
 - Developed customized web forms for data collection and submission
 - Created and edited video content for game software, handheld devices, and web media
 - Clients included: iWin, NBC Universal, Mindscape, Cardiofocus, Intellect International - USA, and Verizon: Games On Demand
- 

ADDITIONAL INFORMATION

- Software experience and working knowledge: Confluence/Jira, Sharepoint, Visual Studio, Photoshop/Illustrator, WordPress, cPanel web config, SQL Server, and Microsoft Office Suite
- Possess basic mobility in: SQL/MySQL, NPM, Node.js, Python and PHP

EDUCATION

Computer science, Atlantic Cape Community College — 2008
